Table of Contents

Context & Problem Diagnosis

The challenge with manual, inconsistent evaluations at Amex

Insight & Opportunity

Why Explainable GenAI is the right moment & fit for Amex

Proposed Solution – FITScore

Dual-mode AI engine for HR and Procurement

Technology Architecture & Stack

Enterprise-ready stack with explainability and bias control

Implementation Roadmap

How Amex can adopt FITScore across internal systems

Impact & Theme Alignment

Projected efficiency gains and Amex's 3-theme connection

Strategic Fit & Differentiation

How FITScore aligns with Amex's GenAI transformation

Context & Problem Diagnosis

Manual Evaluation is Slow, Subjective, and Risk-Prone

Challenge	Current Impact	Pain Point
Resume & RFP overload	Hundreds reviewed manually	Time-intensive & inconsistent
Keyword-based filters	Shallow matching	Misses context & transferable skills
Black-box AI tools	No explainability	Compliance & audit challenges

HR and procurement workflows face information overload; current tools lack transparency and consistency.

Manual Review → Slow & Subjective → Compliance Risk

We spend hours deciding between candidates or vendors — and can't explain why.

Insight & Opportunity

Explainable GenAI Can Turn Decisions Into Data

- Embed GenAI into HR & procurement to **reduce manual load**.
- Provide **traceable, bias-controlled scoring** for regulators.
- Offer as a **SaaS product** for Amex's corporate clients.

AI that can reason and show evidence makes decision-making scalable

Proposed Solution - FITScore

FITScore: Unified AI Engine for Talent & Proposal Evaluation

With one unified pipeline, Amex can use the same system to evaluate people, partners, or even project bids

FITScore standardizes how Amex ranks candidates and vendor proposals using a shared GenAI architecture.

Technology Architecture & Stack

Enterprise-Ready Stack Aligned with Amex's Responsible AI Standards

Layer	Key Technologies	Purpose	AMEX Theme
UI Layer	Streamlit (MVP) · React (Scale)	Interactive web app	Productivity
Backend	FastAPI (Python)	Scoring & Bias Logic	Growth
AI Layer	Vertex AI + Gemini 1.5 Pro	GenAI reasoning & explainability	Protection
Vector DB	FAISS / PGVector	Semantic search	Productivity
Storage	BigQuery + GCS	Secure data handling	Protection
Security	OAuth2 + IAM + Audit Logs	Compliance-ready	Protection

The system is designed to be secure, scalable, and explainable. Built entirely on enterprise-grade cloud tools.

Implementation Roadmap

How American Express Can Implement FITScore Across Core Operations

FITScore can be introduced gradually.
first to internal HR and Procurement teams, then scaled to partner ecosystems and client-facing platforms.
ensuring low disruption and high compliance.

Impact & Theme Alignment

Efficiency Impact (Projected) and Alignment with Amex Priorities

Efficiency Impact (Projected)

- Up to 60% faster evaluation cycles (automated scoring + explainability)
- Reduced re-review cycles through consistent scoring logic
- Shorter audit cycles with traceable FITScore evidence

	How FITScore Delivers
Productivity	AI shortlisting, auto gap reporting
Protection	Bias testing, PII masking, audit logs
Growth	Cross-functional use + B2B expansion

FITScore delivers measurable productivity while reinforcing Amex's Responsible AI vision.

Strategic Fit & Differentiation

Why FitScore Aligns with American Express's GenAI Transformation

Strategic Alignment

- Reinforces Amex's GenAI pillars: **Productivity, Protection, Growth.**
- Mirrors Amex's current AI direction internal copilots, responsible AI governance, and scalable frameworks.
- Integrates seamlessly into Amex's **existing systems (Workday, Ariba, IAM)** via API connectors.

Competitive Differentiation

- **Unified Engine:**
Evaluates both *people* and *partners* — rare dual-domain capability.
- **Explainability Core:**
Transparent scoring with citations → audit-ready.
- **Bias-Safe Design:**
Blind review mode & counterfactual bias checks.
- **Enterprise Stack:**
Built on Vertex AI + GCP + FastAPI = compliance-ready scalability.

Impact for Amex

- Enhances **operational efficiency** in HR + Procurement.
- Demonstrates **Responsible GenAI leadership** within financial services.
- Opens pathway for **client-facing B2B AI products** ("Amex Enterprise AI Suite").

FITScore isn't just a tool.
It's a strategic capability that strengthens Amex's push toward a GenAI-powered enterprise built on trust, transparency, and operational excellence.
