Data Analyst with experience in AI/ML and NLP solutions, specializing in developing and deploying scalable machine learning workflows on GCP using Python and TensorFlow. Skilled in data preprocessing, experimentation, model validation, and building end-to-end analytics pipelines for structured and unstructured data.

WORK EXPERIENCE

Mindgraph Solutions Sdn Bhd 10/2024 - 08/2025

Data Analyst - Generative AI Team | Projects: Malaysia Airports Holdings Berhad Kuala Lumpur, Malaysia

- Designed and deployed NLP and LLM-based solutions for enterprise knowledge management and automation.
- Performed EDA and hypothesis-driven analysis on structured and unstructured operational datasets.
- Built and deployed scalable ML workflows on GCP (Vertex AI, BigQuery, Cloud Run)
- Collaborated with stakeholders to translate business requirements into analytical solutions.

Mindgraph Solutions Sdn Bhd 05/2024 - 09/2024

Data Science Intern | Projects: Malaysia Airports Holdings Berhad Kuala Lumpur, Malaysia

- Developed a Python script to store data collected from airport sensors in a database.
- Performed web scraping to extract information of MAHB from relevant websites.
- Created a pipeline that extracts information from historical PDFs to a database.

MarketsMojo Asset Management Private Limited 11/2023 - 01/2024

Data Science Intern Mumbai, India

- Built predictive models and performed feature engineering on financial datasets for forecasting.
- Applied data preprocessing and feature engineering for forecasting.

Ace Resources Advisory Services Sdn Bhd 11/2022 - 02/2023

Data Science Intern | Projects: Asia Symbol (Rizhao, China); Apical (Balikpapan, Indonesia) Kuala Lumpur, Malaysia

- Processed real-time data using Python for analytics.
- Built a Neo4j graph database for vessel management and developed client-required visualizations.

EDUCATION

Singapore University of Technology and Design 10/2025-Present

Master of Science in Technology & Design (Data Science) Singapore

Monash University 11/2020-08/2024

Bachelor of Computer Science and Data Science Malaysia

SKILLS & INTERESTS

- **Skills:** AI/ML & Tools: TensorFlow, NLP, Hugging Face, ML Pipelines, Model Validation, Feature Engineering, Python, SQL, ETL, APIs, GCP (Vertex AI, BigQuery, Cloud Run)
- **Interests:** Data Analytics; Machine Learning; Hackathons; Building Data-Driven Applications; Fitness; Traveling

CERTIFICATION & ACHIEVEMENTS

Top 16 – Monash Hackathon 2021 (Junior Category); Volunteer – Monash University Volunteer Program (MUVP); Neo4j Certified Professional; 1st Place – Visa (Creative Spark: Best Idea); 1st Place – Syfe (Creative Spark: Best Idea); Exemplary Innovation by Design Award – Singapore University of Technology and Design (2026)
